EXPERIENCE

Topaz, Montevideo

APRIL 2022 - PRESENT

Mobile Developer

Developing Mobile Banking applications using React and React Native with Typescript as the main set of tools.

Collaborating daily with project PO, BA, Devs during stand-up meetings to align priorities, discuss progress, and address blockers.

Working closely with QA teams to maintain high-quality standards, performing thorough testing and resolving issues before each release.

Communicating fluently with UX/UI designers to improve user experience and ensure cohesive design implementation.

Utilizing tools and technologies such as Git, Jenkins, Figma, and Jest to streamline development workflows and ensure code quality.

SQL Developer

Worked as SQL Developer, offering support and customer experience for a product called Trace that functions as a fraud detection and money laundering prevention system.
